SUPERVISORY PATENT EXAMINER

Continuation of 11, does NOT place the application in condition for allowance because: In response to applicant's arguments on pages 14-15, of applicant's response,

Zigmond discloses a targeted advertising system wherein ad attribute information and user selection history information is compared to select advertisements for a viewer (column 11, lines 17-49 and column 17, lines 10-20). Zigmond further discloses wherein the system will discard advertisements having a value less then or equal to some predetermined threshold value, as ads are pre-screened and only ads meeting the viewers selection criteria is retained (column 15, lines 17-23 and column 17, lines 10-20).

Zigmond fails to specifically disclose the specific mechanism for calculating which ads are retained or discarded, i.e. calculating similarity scores for each of the ads and discarding ads which have a score less then or equal to the threshold.

Review of the Knee reference shows that Knee does specifically disclose the features of comparing user selection information (paragraphs 35, 36 and 50) and ad attribute information (paragraphs 46, 47 and 50) to calculate similarity scores for the ad (paragraph 47). Only ads exceeding a threshold value are then chosen for display (as ads must meet some minimum value; paragraph 32).

Thus, the combination of Zigmond and Knee clearly disclose the current claim limitations, and therefore applicant's arguments are not persuasive.
